

Luisa Londoño Escobar

Product Designer

Medellín, Antioquia, Colombia · +57 314 853 7617 · luisalondono98@gmail.com · linkedin.com/in/luisalondonoesobar

Summary

Product designer with 5+ years of experience in digital design — from graphic design to UX, design systems and front-end collaboration — versatile and resourceful, adapting to challenges and integrating aesthetics and functionality to create detail-oriented, effective and innovative solutions, combining systems thinking with close collaboration across multidisciplinary teams from discovery to implementation. Passionate about arts & crafts, music, science and writing.

Experience

Quipux · Medellín, Antioquia, Colombia

UX Designer

July 2025 – Present

- Authored the first design proposal for a national-scale government services portal, establishing a scalable interaction model that helps citizens understand a procedure before starting it.
- Co-designed and implemented a Figma-to-Docusaurus automation pipeline with Claude Code that documented most of the components in our design system in a single sprint.
- Built reusable WordPress page templates and content blocks for mobility Secretariat portals, applying UX, accessibility, mobile-first and SEO best practices to help publish clear, findable content for citizens.
- Own the full design kit for each new operation onboarded to Quipux — public and private home screens, corporate profile, email and document templates, and on-site assets — working closely with the teams gathering client requirements firsthand.
- Design end-to-end flows for both backoffice and frontoffice users, translating them into high-fidelity prototypes that are functional, scalable and responsive — significantly reducing cognitive load.
- Run detailed QA reviews against our design system; use Wave and Microsoft Clarity to evaluate usability and accessibility against WCAG 2.1 AA and Nielsen's 10 heuristics, then triage findings into prioritized improvements.
- Develop high-fidelity mobile prototypes for Android and iOS, delivering every screen plus the assets development needs for implementation.
- Use AI tools, especially Claude Code and Figma Agent, to automate parts of the design process, including prototyping, documentation, UX writing and QA.

Graphic Designer

June 2021 – July 2025

- Led graphic design and media production for internal and external communications, digital and editorial advertising, and key brand elements.
- Collaborated on a phygital spaces service integrating the company's digital solutions for clients.

Cheetah Conversions · Berlin, Germany

Marketing & Design Intern

November 2019 – July 2020

- Designed landing pages in Unbounce and WordPress, using A/B testing to improve engagement.
- Produced clear, visually-driven case study reports for clients.

Education

EAFIT University · Graduate, Product Design Management · 2020–2021

EAFIT University · Bachelor, Product Design Engineering · 2015–2020

Skills

Design & Prototyping: Figma, Adobe XD, WordPress

Industrial & 3D Design: Creo Parametric, SolidWorks, Keyshot

Front-end: Angular, AngularJS, JavaScript, HTML5, CSS3, PrimeNG

Methods & Collaboration: Design Thinking, A/B Testing, User Research, Git, Notion, Office365

Visual & Motion: Illustrator, Photoshop, InDesign, After Effects

Design Systems: Design Tokens, Docusaurus, Storybook

QA & Accessibility: Lighthouse, Wave, Microsoft Clarity, WCAG 2.1 AA, Nielsen's Usability Heuristics

AI Tools: Claude, Claude Code, ChatGPT, Codex, Figma Agent, Antigravity
