SUMMARY

Product designer with 5+ years of experience across UX, design systems and front-end collaboration. I design digital products from discovery to implementation, combining systems thinking with close collaboration across multidisciplinary teams. Versatile and resourceful, I adapt quickly to new challenges, balancing functionality and aesthetics to create detail-oriented, effective solutions.

EXPERIENCE

Quipux · Medellín, Antioquia, Colombia

UX Designer

July 2025 – Present

- Redesigned multi-step, citizen-facing government service flows, reducing cognitive load and improving comprehension end to end.
- Built reusable WordPress page templates and modular content blocks, standardizing how public-sector content is published across teams.
- Contributing to an enterprise design system — components, design tokens and content guidelines — adopted across multiple product teams.

Graphic Designer

June 2021 – July 2025

- Led graphic design and media production for internal and external communications, digital and editorial advertising, and key brand elements (logos, key visuals).
- Conducted market research and demographic analysis to identify opportunities; analyzed technical annexes for national and international tenders.
- Coordinated project management, budgeting and scheduling across service delivery.
- Created, adapted and translated content between Spanish and English.
- Collaborated on a phygital spaces service integrating the company's digital solutions for clients.

Cheetah Conversions · Berlin, Germany

Marketing & Design Intern

November 2019 – July 2020

- Designed landing pages in Unbounce and WordPress, using A/B testing to improve engagement.
- Created client-specific social media visual content and communication strategies.
- Produced clear, visually-driven case study reports for clients.
- Supported SEO for owned and client brands through data-driven strategies.
